

Myanmar Unicode Keyboard Layout

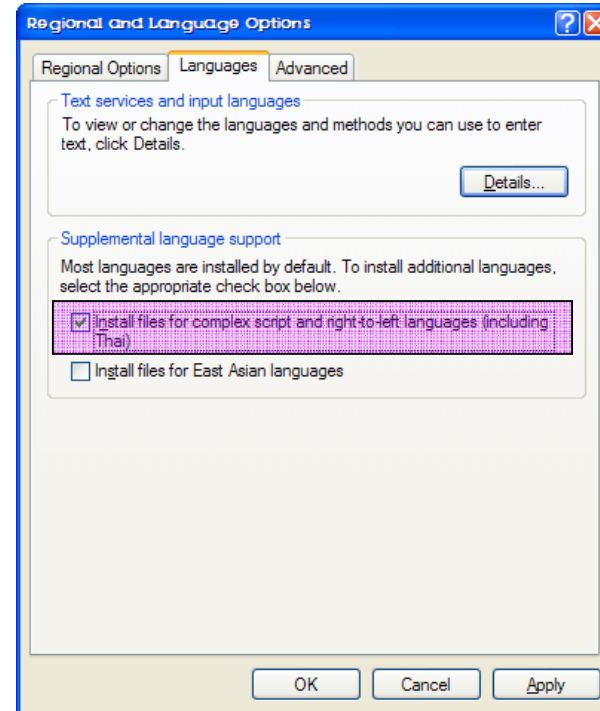

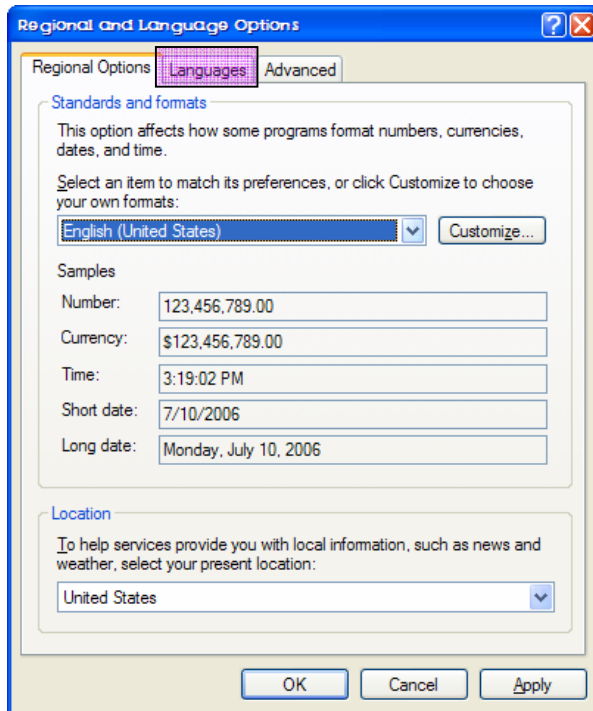

မင်္ဂလာ --- မ + င + င + (Shift + f) + ဝ + လ + ဝ

စက္ကလ ---- စ + က + (Shift + f) + က + လ

To install complex script and right-to-left language files

You must be logged on as an administrator or a member of the Administrators group in order to complete this procedure. If your computer is connected to a network, network policy settings may also prevent you from completing this procedure.

1. Open Regional and Language Options in Control Panel.
2. On the **Languages** tab, under **Supplemental language support**, select the **Install files for complex script and right-to-left languages** check box. (Note that filled color must be Click)

3. Click **OK** or **Apply**.
4. After the files are installed, you must restart your computer.

Note

•To open Regional and Language Options, click **Start**, click **Control Panel**, click **Date, Time, Language, and Regional Options**, and then click **Regional and Language Options**.

Using Keyman Keyboard

- Choose “Myanamr2” To type Myanmar letter.
- Choose “No Keyman Keyboard” to type English letter.
